OBJECTIVE

As a fresher, I aim to contribute to innovative software solutions at your company by applying my technical skills and knowledge. I am driven to gain hands-on development experience, advance my programming proficiency, and become adept in relevant frameworks. I aim to fortify the groundwork for a thriving career in software development at your company, playing an active role in the company's advancement. I aspire to craft top-tier software solutions, foster innovation, and optimize operational efficiency for the company's growth and success

EDUCATION

Ton Duc Thang University
Major: Computer Science
Expected graduation: Apr 2024

TECHNICAL SKILL

Programming Languages	Java, JavaScript
Frameworks and libraries	Spring, ReactJS
Database Management	MySQL, PostgreSQL
Version Control	Git
Knowledge	Object-Oriented Programming (OOP), MVC, Unit Testing, Scrum

WORK EXPERIENCE

Sep 27, 2022 - Dec 23, 2022	Intern Full-stack Developer - Nashtech <ul style="list-style-type: none">Developed expertise in Spring Boot and ReactJS through active learning and practical application.Engaged in a simulated Asset Management project, implementing Scrum methodology for effective project management and collaboration.Planned, demos, retrospectives, and daily standups for each sprint.Analyzed user stories and meticulously examined acceptance criteria for precise implementation.Designed databases and systems to meet project requirements.Independently managed tasks, ensuring timely completion within sprints.Collaborated closely with testers to address and resolve identified bugs.Conducted thorough code reviews for pull requests to maintain code quality.
-----------------------------	--

PROJECT EXPERIENCE

Nov 20, 2022 - Dec 17, 2022

Simulate Project: Asset Management

Role: Full-stack Developer

Duration: One month

Technologies Used: Spring Boot, PostgreSQL, REST APIs, ReactJS, Ant Design, Postman.

- The functionalities include employee management, asset management, creating asset registration sessions for employees, creating asset return requests, managing asset return requests, and generating asset registration statistics.
- Participated in designing the database based on requirements
- Participated in developing a plan for setting up the necessary techniques and establishing general guidelines for project development (coding conventions).
- Implemented the functionality and design UI for managing assets, monitoring asset borrowing, and generating asset reports within the company.
- Wrote unit tests for each implemented functionality.

Sep 15, 2022 - Oct 25, 2022

Pet Project: Shoe Store E-commercial Website

Role: Full-stack Developer

Duration: One month

Technologies Used: Spring Boot, PostgreSQL, REST APIs, ReactJS, Postman

- A small project was developed for a shoe store, incorporating features such as product listing with filters, product purchasing, and rating capabilities.
- Designed the database.
- Implemented and designed the UI for each functionality.
- Wrote unit tests

CERTIFICATIONS

Dec 23, 2022

Certificate of completion: completed "THE ROOKIES" program by NashTech

Aug 30, 2022

TOEIC Certificate with score 695 by IIG Viet Nam
